Many natural processes follow the cycle of the waxing and waning moon. Join us and immerse yourself in the vastness of the universe amid breathtaking natural scenery at night.

ONE HUNDRED METRES UP ON THE SEITWAND ROCK FACE, THE ADLERBLICK VIEWING PLATFORM IS PERCHED HIGH ABOVE FEICHEN.

Here you can get up close to the mighty peaks of the Kaunertal mountains and get a bird's eye view of the valley. A small footpath connects the Adlerblick viewing platform with the Bergwerksblick viewing platform. This platform overlooks a steep slope where centuries ago the Kaunertal valley miners used to mine.

This is the starting point for a journey into the past and into the heart of the mountain. The Knappensteig trail leads hikers through the history and tradition of mining in the Kaunertal valley. Search for ore yourself at the miners' hut and share a snack with the wooden miners. Two accessible miner's caves from the 16th and 17th centuries can also be visited along the trail.
